---

Counsel – I know there was a formal preservation letter sent to the City at the start of the litigation. I simply want to state our request that *all* evidence in this case be preserved. In particular if records or database entries are changed or modified it is important that our experts be able to reconstruct all actions taken from the arrest of Mr. Spriestersbach going forward. This applies to all state databases including ecrim, Department of Public Safety, jail databases, law enforcement databases, public defender databases, hospital databases, and other electronic and paper records. Please advise your clients. Thank you.
